

CST-105: Programming Exercise 4

1. Review the Rubric for this assignment before beginning work. Be sure you are familiar with the criteria for successful completion. The rubric link can be found in Loud Cloud under the assignment.
2. Write a program that reads text from a file. For each word read, output the original word and its Pig-Latin equivalent in all-caps, in a tabular format. You can read about the rules for Pig-Latin here:

https://en.wikipedia.org/wiki/Pig_Latin

Here is a sample run of the program for the following input file

```
It was a dark and stormy night
```

Program output

It	ITWAY
was	ASWAY
a	AWAY
dark	ARKDAY
and	ANDWAY
stormy	ORMSTAY
night	IGHTNAY

3. Make a LOOM video of your project. In your video, discuss your code and run your program.

Submit the following in Loud Cloud:

- Your program (.java)
- A link to your LOOM video
